SUMMARY:

I'm a front-end developer with 3+ years of extensive experience in crafting user interfaces and converting designs into efficient, high-quality code. I specialize in accessibility, performance, and SEO to create user-friendly web & mobile applications.

EXPERIENCE:

- StratoSphere IT Services** **Sept 2024 to Current**
Reach Developer
- Spectus Infotech** **March 2022 to June 2024**
Senior Front-End Developer / Team Lead
- Groovy Web** **May 2021 to Jan 2022**
Front-End Developer
- Self Employed** **May 2019 to Jan 2021**
Owner & Proprietor of Clothing Business
- Back Office Executive** **July 2018 to March 2019**
Locum in an International Recruitment Company

PROJECTS:

- Design Studio App:** *React.js, MUI, Redux Toolkit*
Created a feature-rich Design Studio app inspired by Canva, allowing easy design creation and editing. Integrated AI to convert YouTube URLs into customizable PDF documents with AI-assisted prompts. Developed a robust content management system to improve user experience and app functionality.
- Transshipment Network Platform:** *React.js, MUI, Redux, Formik*
Developed a Transshipment Network Platform for managing container bookings, tracking, and price negotiations, with role-based access control and multi-currency payment handling. Created an intuitive content management system for secure admin operations.
- Marketplace for Digital Services** *React.js, MUI, Redux, Formik*
Created a marketplace platform like Upwork for freelancers and customers to manage profiles, services, and bookings. Added cryptocurrency payment options and real-time chat for seamless communication.
- HR Management Platform:** *React.js, React-native, MUI, Redux, Formik*
Built an advanced HR Management Platform with role-based access for different user levels. Included features for scheduling video interviews, managing candidates, custom question sets, automated result sharing, and integrated attendance and leave management.
- Digital Wallet System:** *React.js, React-native, MUI, Redux, Formik*
Created a Digital Wallet System like Google Pay for secure payments via QR codes, phone numbers, and bank details. Added two-factor authentication, multi-wallet management, and investment features, with a user-friendly interface for easy transactions.
- Innovative Driver Education Platform:** *React.js, React-native , MUI, Redux, Formik*
Developed a Driver Education platform like Uber for online classes, driving lessons, and exams. Included payment options, live tracking, and a content management system for improved admin oversight and efficiency.
